

WINDOW WELL SCENES

Installation Instructions

1. Select

Once you have chosen the area for your Biggies™ Wall Mural, plan for the center of the print to be at eye level or a little below. You might want to unroll the mural against your wall so you can choose the best placement. Standard walls are 8 feet high. Measure down from the ceiling in multiple places and see if this makes the best position for the top line of your mural in this particular room. Mark the wall lightly with a pencil in several spots to give you a visual target for placement of the fasteners.

2. Prepare & Clean

Wipe the wall so it is free of dust. If it is greasy, wash the wall with an appropriate wall cleaner, and dry the wall completely. If you have a level, it can help you be sure your poster hangs straight.

3. Attach

Attach a fastener FIRMLY to the wall at multiple spots just beneath the pencil marks you made.

Unroll the mural and pull it gently to remove slack as you attach the top edge of the mural to each fastener on the wall. Have one person check the top edge with the level in several places as you work. As you get to the second upper corner, attach a fastener close to the corner. Then, smooth the mural with your hand down the center and then toward each lower corner. Add remaining fasteners to secure the edges, the bottom of the mural, and the corners.

4. Finish

If you choose to add trim molding around your mural, it will look like a huge framed picture on the wall.

5. Enjoy!

Stand back and enjoy your gorgeous new image.
