

STOP THE SLIP with
HANDI TREADS

GRIT TREADS: The Importance of Slip, Trip, and Fall Prevention

For anyone looking to make their home or business safer by preventing slip and fall accidents, HandiTreads® are the perfect solution. By installing HandiTreads Grit Treads in the home, homeowners can prevent hospital stays and traumatic injuries that are results of trips, slips, and falls. Business owners can make their businesses safer and reduce occupational injuries that include days of missed work.

What are HandiTreads Grit Treads, and Why Should I Buy Them?

HandiTreads Grit Treads and Tape are adhesive-backed silica carbide treads that can be easily cut to size to provide extra traction in any area of a home or business. Grit Treads and Tape feature industrial-strength adhesive for long-lasting use. They are available in four colors, including our unique photoluminescent shade that glows for up to 8 hours after as little as 30 minutes of light exposure. Highly resistant to moisture and oil, our adhesive-backed grit treads and tape are a cost-effective solution that will protect against slips, trips, and falls for multiple seasons in homes, garages, and businesses.

User-Friendly Installation

HandiTreads Grit Treads and Tape can be installed on sound, non-porous surfaces with minimum prep work. First, ensure the area is cleared of any dirt and debris. We recommend using a high-quality degreaser to remove any oil buildup that could interfere with the adhesive. Next, rinse the area well and allow it to dry fully. Then, align the tread to the area on which it will be installed, pull back about an inch of the paper backing and firmly press exposed adhesive into place. Continue to peel the paper backing as you press the tread or tape into place, monitoring the positioning while you go.
