

CLEAR GRIP: The Importance of Slip, Trip, and Fall Prevention

For anyone looking to make their home or business safer by preventing slip and fall accidents, HandiTreads® ClearGrip are the perfect solution. Traditional floormats pose their own slip, trip, and fall hazards. ClearGrip helps prevent hospital stays and traumatic injuries that are the result of trips, slips, and falls on hard surfaces.

What are HandiTreads ClearGrip Treads and Tape, and Why Should I Buy Them?

HandiTreads ClearGrip line consists of transparent vinyl non-slip treads and tape rolls that drastically reduce slips, trips, and falls. Since the back is covered entirely in adhesive, the treads and tape will not roll or fold over like traditional mats. The ClearGrip line is transparent, allowing the beauty of the wood, tile, or other smooth floorings to shine through. ClearGrip is mop-friendly and works well in both wet and dry environments, making them ideal for bathrooms, kitchens, entryways, and staircases.

Simple User-Friendly Installation

To install Clear Grip, all a customer needs is to clean the floor with a high-quality cleaner and degreaser to remove dirt and oils, dry the surface completely, peel and stick the strips in place ensuring there are no bubbles where water can be trapped. Starting at one end, peel back about an inch of the paper liner, align the tread or tape, and press into place, continue peeling back the paper and pressing the mat into place being careful to avoid air bubbles.
